IC REALTIME
Introducing **ella**
The first Deep Learning search engine for security camera streams.

**OLD WAY**

Tired of looking through hours of video to find a 30-second clip?

**NEW WAY**

Search all video surveillance feeds in seconds using natural language.

**With ella it’s simple.**

Just ask ella what you’re looking for and in seconds it’s there. ella is compatible with most brands that are currently being sold and is open to industry standard RTSP video.
ICR introduces:

**Intelligent Video Search Engine**

Our new product “ella” is an open platform for smart video monitoring. It scales from a single pet cam at home to 1000s of video streams in data centers. It works with all cameras, DVRs, NVRs, and VMSs that support standard H.264 RTSP video streams.

---

**Any Device**

Open to all video streams—including those you already have. Record with any Android, iOS, Browser, VMS, NVR, or IP camera.

**Cloud Storage**

IC Realtech’s ella serves all your recorded video from the cloud, so you never have to worry about reliability or speed.

**Personalized Alerts**

Search-based video alerts tell you whenever something important happens that matches your query.

Using the most advanced machine learning algorithms, ella is able to identify the most important events that were recorded. ella also learns what you care about from the way you use it, so it gets smarter over time, continuously improving your daily summaries and alerts.

INSTALLATION CORNER: WHY USE BULLET CAMERAS?

Bullet cameras are generally smaller and easier to install than dome cameras, making them a good option for residential installations. Because they are so easy to install, bullet and box cameras also have more placement options available. However, unlike most dome cameras, it is easy to see where a bullet or box camera is pointing. Many installations require a combination of bullet/box and dome cameras.

Unlike traditional IR illumination, which maintains the same level of light and can produce images that are either too dark or too light, Smart IR Illumination senses when its surroundings are brighter or darker and compensates accordingly. No more dim night shots or blown-out, overexposed images. Smart IR Illumination will guarantee a perfectly exposed image no matter what the lighting conditions.

IC REALTIME HAS A CAMERA FOR EVERY BUDGET & PROJECT SIZE

Affordable products that offer maximum surveillance bang for the buck. Perfect for homes, offices and small businesses.

These products strike a balance between affordability and high-end features. Ideal for larger projects like office buildings, parking lots and shopping centers.

Our top-of-the-line products offer the very latest features and the highest resolution. Suitable for the largest projects or for clients whose unique needs call for the finest surveillance technology.
TOUGH ENOUGH TO HANDLE THE MOST EXTREME AND LIMITED LOCATIONS

Customized surveillance recorders built to withstand the harshest weather conditions in the tough to integrate locations.

Harsh weather conditions sometimes destroy even the finest surveillance equipment. Regardless of intense local weather, clients need the protection video surveillance provides. That’s where NEMA boxes come into the picture. NEMA boxes are graded at different levels depending on the amount of protection desired. These boxes can protect equipment from minor hazards like sunlight and dust all the way up to industrial chemicals and corrosive liquids or gasses.

The NEMA series consists of a full real-time Pentaplex recorder with internet accessibility, fused power distribution for all cameras and 120V AC outlets in a NEMA rated, fan cooled weatherproof box.
